Who We Are?

Welcome to Nap Recycling

A premier e-waste Management company based in Hyderabad with over 15 years of successful operations. At Nap Recycling we are committed to contributing to a sustainable environment through an efficient and safe management of e-waste.

We are a Telungana Pollution Control Board approved e-waste management company. Telungana PCB guidelines are driven by laws and rules related to e-waste and environment such as the Environment Protection Act, 1986 and E-waste (Management and Handling) Rules 2016 which apply to generators of e-waste management companies.

Our transparent and efficient processes ensure that we are able to provide the most optimal value and solutions for our customer's e-waste management needs arising from the applicable rules and regulations.

Data Security

NAP Recycling India Pvt. Ltd understands our customer's concerns when it comes to Data Security. We are capable of erasing hard drives including SCSI, SATA, FC, SAS, ATA/IDE, SSD.

All Hard drives are tested to customer requirements

Department of Defence 5220.22M

Secure Erase Standard, NIST SP

For those customers where data erasure is not enough , **NAP Recycling India Pvt. Ltd** offers full destruction as well as witness of destruction services.

IT Asset Management

IT Assets designated for resale are transferred to our technical department where they are physically inspected, tested and individually listed in our asset management database.

The following criteria are recorded from each asset.

- Lot tracking number
- Model number
- Pass/Fail Results
- Equipment type
- System configuration
- Serial numbers
- manufacturer
- physical condition
- Customer asset number

Assured Destruction/Recycling

Brand Protection is one of NAP Recycling India Pvt. Ltd core competencies. When Reuse and Remarketing are not an option we destroy and properly recycle our customer's material in an environmentally sound manner.

This means not only destroying the units designated for destruction, but also tracking, auditing, and reporting downstream material flows on a lot-by-lot basis.
